INTRODUCTION TO DESIGN THINKING

The aim of the workshop is to convey the approach, culture and methods of the user-centered innovation method Design Thinking. The participants will run through all phases of Design Thinking in order to gain a basic understanding of the individual process steps. In addition, the participants reflect on the applicability of the principles of Design Thinking to their own innovation work. Each participant takes from the workshop first skills, which can be used directly for working in teams, in meetings or on complex problems.

INTRODUCTION TO HUMAN-CENTRED DESIGN – SUMMER 2023

Human-Centred Design (HCD, often also called User-Centred Design) is an approach of creating digital products and services that puts the human users at the centre. This course provides an introduction to human-centred design, focused on providing good user experience (UX) and usability. Besides learning about the basic theoretical inputs, the participants will work in groups to gain hands-on experiences covering every phase of human-centred design.

SPRING CAMP 2023 – FAMILY DAYS (ADULTS)

Take part in this fun three-day infotech camp for **non-tech** and get a first glimpse in **cybersecurity**, **coding** and **design thinking**. Each day is dedicated to a subject and you will spend the whole day learning the **fundamentals** of each. But that's not all: to go along with this heavy learning, each day will start with a complementary **breakfast** and **coffee** followed by a free **lunch**. To conclude this whole experience, day 3 will end with a "**graduation**" ceremony, where you'll receive your **certification** and **party** with your peers over a beer or a coffee.

Spring Camp 2023 has fun activities for the whole family:

SUCCESSFULLY MANAGE YOUR LEARNING TRACK

Participants will learn how to apply key principles and strategies for effectively managing their learning track as a learning project, from setting goals and creating a plan, to monitoring progress and evaluating success. The course will focus on a minimalistic practical framework to achieve results as planned in an agile environment, with [the open source P3.express approach](#). While the course is designed to support learners who are doing a DLH Learning Track, it is also for anyone who wishes to support their own learning roadmap.

UX / UI SUR DES PROJETS MOBILES

Utilisant les bonnes pratiques professionnelles actuelles, nous aborderons de manière appliquée le processus de conception Design Mobile - Design Thinking. Faisant la découverte des outils de conception d'application mobile, et passant en revue les particularités de différents systèmes d'opérations, nous aboutirons par la réalisation d'un prototype. Cette formation courte et intensive de deux jours, présente un parcours succinct et efficace pour rapidement acquérir les notions essentielles et de s'initier aux pratiques des métiers de concepteur, de développeur, et d'ingénieur d'applications mobiles.

- Apprendre les bonnes pratiques en termes d'UX / UI mobile
- Aborder le processus de conception Design Mobile - Design Thinking
- Comparatif Android / iOS
- Découverte des outils de conception mobile (Figma, Overflow, Zeplin, After Effect)
- Mise en pratique : prototyping
