# IT ADMINISTRATION & CLOUD

## MICROSOFT 365 IDENTITY AND SERVICES

You will examine all the key components that must be planned for when designing your Microsoft 365 tenant. Once this planning phase is complete, you will learn how to configure your Microsoft 365 tenant, including your organizational profile, tenant subscription options, component services, user accounts and licenses, and security groups. Finally, you will learn how to manage your tenant, which includes the configuration of tenant roles and managing your tenant health and services. You will examine the key components of Microsoft 365 management. This begins with an overview of Microsoft 365 product functionality, including Exchange Online, SharePoint Online, Microsoft Teams, Microsoft Power Platform, and device management.

## YOUR JOURNEY TO THE CLOUD (PART 5) – DEVOPS FUNDAMENTALS

When a company wants to implement a DevOps culture, it is important that all the actors who will be part of the journey understand what the DevOps culture is and what it can bring to their daily lives. This training guarantees that the participants will be aligned with the DevOps culture in terms of vocabulary, basic principles, and concepts.

Course programme:

- History of DevOps
- DevOps objectives and vocabulary
- Benefits to the business and IT
- Principles and practices including Continuous Integration, Continuous Delivery, testing, security and the Three Ways
- Frameworks CALMS
- Improved workflows, communication and feedback loops
- Toolchain

## YOUR JOURNEY TO THE CLOUD (PART 6) – FINOPS CLOUD PLATFORM COST MANAGEMENT

Cost management is a challenge with cloud platforms, with a new consumption-based model dominated by OPEX, is stark contrast with the on-premises model make mainly of CAPEX, fixed hardware, and licenses costs. After this course, students will acquire a good understanding of the new model, and how it can be managed and optimized in Azure. Azure is taken as an example and the processes can be transplanted to AWS and Google.
