

42 LUXEMBOURG

LAUNCH YOUR
CODING CAREER

42

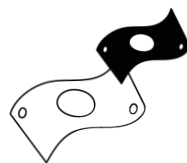

LUXEMBOURG

42 Luxembourg is a full-time, peer-to-peer coding school that prepares you to kickstart your computer science career through collaborative, project-based learning.

Our two-part education program aims to develop your technical and interpersonal skills and prepares you for the expectations of the labor market and the digital career of your choice.

42 Luxembourg takes anywhere from 18 months to 5 years to complete, and everybody can progress at their own pace.

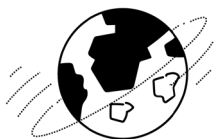

The program is completely free: no admission fees and no hidden costs.

42 takes a project-based peer learning approach: there are no courses or teachers, and you'll review each other's work.

No matter your background or diploma, everybody is welcome at 42 Luxembourg.

Our 24/7 campus is located in Belval and we're part of an international network with thousands of participants.
